Education

2023 – present
Algiers

Master of Science: Artificial Intelligence and Data Science Engineer
The National School of Artificial Intelligence

2023
Akbou, Béjaia

High School Diploma
Hafsa Oum El Mouminin High School
Ranked first in the Wilaya with an average of 18,65 in Mathematics field.

Organizations

2024 – present

Ensia Tech Community (ETC)
HR Head
Led the HR department of a dynamic university tech club, overseeing recruitment, onboarding, and member engagement. Managed evaluation processes, organized internal events, strengthened team cohesion and club culture, and represented the club through media appearances.

Projects

present

Stock Market Investment Optimization System
I'm currently working on a stock market investment optimization system, which helps users allocate investments across companies to maximize ROI based on real-time data, individual risk tolerance, and investment goals.

iQamaty
Dormitory Management Web Platform
Developed a full-stack web application designed to streamline dormitory services for university students and administrators. iQamaty centralizes key features such as announcements, maintenance requests, event registrations, and student-administrator communication, enhancing the overall residential experience through an intuitive, user-friendly interface.
